ASSISTIVE TECHNOLOGY TRAINING

iPhone and iOS 13.2.2

3-Day Intensive iPhone Workshop

Adults with visual impairment will learn how to fully utilize their iPhone and maximize its functions for use in communications, continuing education, time management, organization, travel and more! This **FREE** 3-day intensive workshop will cover:

New Accessibility Features in iOS 13.2.2

- Dark mode to help low vision users who are sensitive to light
- Voice Control, an accessibility feature that can be used with VoiceOver, which allows individuals with physical disabilities to control their iOS device using voice commands
- New and updated VoiceOver gestures
- iPad users can now connect an external storage device to their iOS device. This allows the File app to use an OCR scanner to save a scanned document on the local device.

Basic iPhone Features

- Description of the features and functions of the iPhone
- Basic voiceover gestures
- Exploring settings
- The Rotor
- How to connect the iPhone to the Wi-Fi and other options
- The Phone App
- Emails
- Text Messages
- The App Store
- The News App and how to read stories
- How to save battery life
