

HEALTHY FAMILIES AMERICA

Compassionate Care for Stronger Families

Healthy Families America (HFA) is a free, voluntary home-visiting program designed to support parents and caregivers of young children in Los Angeles County. Through personalized visits, our trained Family Support Specialists provide guidance on child development, positive parenting, and family well-being. Whether you're expecting a baby or have a young child under two, HFA offers culturally responsive support tailored to your family's needs. We also connect families to community resources like health services, child development screenings, and parenting tools to help children thrive. Join us in building stronger, healthier families for the future!
